

# Eligible drugs for Minor Ailments Prescribing (Schedule 4 of O. Reg. 256/24)

|                                                      |                    |
|------------------------------------------------------|--------------------|
| <b>ACNE (MILD)</b>                                   |                    |
| <b>Skin &amp; Mucous Membrane Agents</b>             |                    |
| • Adapalene                                          | • Glycolic acid    |
| • Azelaic acid                                       | • Salicylic acid   |
| • Benzoyl peroxide                                   | • Tazarotene       |
| • Clindamycin                                        | • Tretinoin        |
| • Dapsone                                            | • Trifarotene      |
| • Erythromycin                                       |                    |
| <b>ALLERGIC RHINITIS</b>                             |                    |
| <b>Antihistamines</b>                                |                    |
| • Azelastine                                         | • Fexofenadine     |
| • Bilastine                                          | • Loratadine       |
| • Cetirizine                                         | • Olopatadine      |
| • Cyproheptadine                                     | • Rupatadine       |
| • Desloratadine                                      |                    |
| <b>Corticosteroids</b>                               |                    |
| • Beclomethasone                                     | • Fluticasone      |
| • Budesonide                                         | • Mometasone       |
| • Ciclesonide                                        | • Triamcinolone    |
| <b>CALLUSES AND CORNS</b>                            |                    |
| <b>Keratolytic Agents</b>                            |                    |
| • Salicylic acid                                     |                    |
| <b>CANDIDAL STOMATITIS (ORAL THRUSH)</b>             |                    |
| <b>Antifungals</b>                                   |                    |
| • Nystatin                                           |                    |
| <b>CONJUNCTIVITIS (BACTERIAL, ALLERGIC OR VIRAL)</b> |                    |
| <b>Antiallergic Agents</b>                           |                    |
| • Antazoline                                         | • Ketotifen        |
| • Bepotastine                                        | • Lodoxamide       |
| • Cromolyn sodium                                    | • Olopatadine      |
| (Sodium cromoglycate)                                | • Pheniramine      |
| <b>Antibacterials</b>                                |                    |
| • Erythromycin                                       | • Polymyxin B      |
| • Fusidic acid                                       | • Tobramycin       |
| • Gramicidin                                         | • Trimethoprim     |
| <b>Vasoconstrictors</b>                              |                    |
| • Naphazoline                                        | • Phenylephrine    |
| • Oxymetazoline                                      | • Tetrahydrozoline |

|                                                        |                                    |

| <b>DERMATITIS (ATOPIC/ECZEMA, ALLERGIC OR CONTACT)</b> |                                    |
| <b>Anti-inflammatory Agents</b>                        |                                    |
| • Beclomethasone                                       | • Fluocinolone                     |
| • Betamethasone valerate                               | • Hydrocortisone                   |
| • Clobetasone                                          | • Prednicarbate                    |
| • Crisaborole                                          | • Triamcinolone                    |
| • Desonide                                             |                                    |
| <b>DERMATITIS (DIAPER)</b>                             |                                    |
| <b>Antifungals</b>                                     |                                    |
| • Ciclopirox                                           | • Miconazole                       |
| • Clotrimazole                                         | • Nystatin                         |
| • Ketoconazole                                         |                                    |
| <b>Anti-inflammatory Agents</b>                        |                                    |
| • Desonide                                             | • Hydrocortisone                   |
| <b>DRY EYE DISEASE (XEROPHTHALMIA)</b>                 |                                    |
| <b>Ophthalmic Lubricants</b>                           |                                    |
| • Carboxymethylcellulose                               | • Mineral oil                      |
| • Dextran 70                                           | • Petrolatum                       |
| • Glycerin                                             | • Polyethylene glycol (PEG)-400    |
| • Hydroxypropyl (HP)-guar                              | • Polyvinyl alcohol                |
| • Hypromellose (hydroxypropyl methylcellulose)         | • Polyvinyl pyrrolidone (povidone) |
| • Lanolin                                              | • Propylene glycol                 |
| <b>DYSMENORRHEA</b>                                    |                                    |
| <b>Nonsteroidal Anti-inflammatory Agents</b>           |                                    |
| • Acetylsalicylic acid (ASA)                           | • Ibuprofen                        |
| • Celecoxib                                            | • Ketoprofen                       |
| • Diclofenac                                           | • Mefenamic acid                   |
| • Flurbiprofen                                         | • Naproxen                         |
| <b>GASTROESOPHAGEAL REFLUX DISEASE (GERD)</b>          |                                    |
| <b>Antacids and Adsorbents</b>                         |                                    |
| • Alginate acid                                        | • Calcium carbonate                |
| • Aluminum hydroxide                                   | • Magnesium salts                  |
| <b>Histamine H2-Antagonists</b>                        |                                    |
| • Cimetidine                                           | • Nizatidine                       |
| • Famotidine                                           | • Ranitidine                       |

|                                                   |                   |
|---------------------------------------------------|-------------------|
| <b>Proton-Pump Inhibitors</b>                     |                   |
| • Dexlansoprazole                                 | • Omeprazole      |
| • Esomeprazole                                    | • Pantoprazole    |
| • Lansoprazole                                    | • Rabeprazole     |
| <b>HEMORRHOIDS</b>                                |                   |
| <b>Skin and Mucous Membrane Agents</b>            |                   |
| • Dibucaine (Cinchocaine)                         | • Phenylephrine   |
| • Esculin (Aesculin)                              | • Pramoxine       |
| • Framycetin (Neomycin B)                         | • Zinc sulfate    |
| • Hydrocortisone                                  |                   |
| <b>HERPES LABIALIS (COLD SORES)</b>               |                   |
| <b>Anti-inflammatory Agents</b>                   |                   |
| • Hydrocortisone                                  |                   |
| <b>Antivirals</b>                                 |                   |
| • Acyclovir                                       | • Famciclovir     |
| • Docosanol                                       | • Valacyclovir    |
| <b>IMPETIGO</b>                                   |                   |
| <b>Antibacterials</b>                             |                   |
| • Bacitracin                                      | • Mupirocin       |
| • Fusidic acid (Sodium fusidate)                  | • Ozenoxacin      |
| • Gramicidin                                      | • Polymyxin B     |
| <b>INSECT BITES AND URTICARIA</b>                 |                   |
| <b>Antihistamines</b>                             |                   |
| • Bilastine                                       | • Diphenhydramine |
| • Cetirizine                                      | • Fexofenadine    |
| • Chlorpheniramine                                | • Hydroxyzine     |
| • Cyproheptadine                                  | • Loratadine      |
| • Desloratadine                                   | • Rupatadine      |
| <b>Antipruritics and Anti-inflammatory Agents</b> |                   |
| • Benzocaine                                      | • Lidocaine       |
| • Calamine                                        | • Menthol         |
| • Camphor                                         | • Pramoxine       |
| • Desonide                                        | • Zinc oxide      |
| • Hydrocortisone                                  |                   |
| <b>MILD HEADACHE (TENSION TYPE)</b>               |                   |
| <b>Analgesics</b>                                 |                   |
| • Acetaminophen                                   | • Ibuprofen       |
| • Acetylsalicylic acid (ASA)                      | • Naproxen        |
